

The Furntech-AFRDI Green Tick

Sustainable Furniture List

Products Certified to
AFRDI Sustainability Standard 150 –
Commercial Furniture

Furntech-AFRDI Approved Products

The suppliers of the listed products have undertaken to maintain quality standards, to advise Furntech of model changes and complaints and to accept a system of random audits.

AFRDI Standard 150 seeks to engage the commercial furniture manufacturing sector at different levels, each with increasing commitment to the broad principles of sustainability:

Level C (Silver) – the entry level, seeks to engage applicants who are in the early stages of addressing sustainability objectives. Level C of the Standard provides companies with clear initiatives to address, which will improve their current level of engagement with sustainability objectives. It is an expectation that most applicants gaining Level C will actively pursue a higher level of certification.

Level B (Gold) – the good practice level, seeks to engage applicants who are already well established in addressing sustainability objectives. Level B of the Standard awards companies which have met all entry level requirements while additionally ensuring an extra level of recognition for the implementation of green initiatives and eco-conscious actions that currently represent good, sound environmental practice.

Level A (Platinum) – the best practice level, seeks to engage applicants who go beyond implementing the measures currently regarded as good environmental practice. Level A of the Standard includes the most rigorous verification processes, and acknowledges pioneering, vanguard companies which are presently leading industry with their sustainability-oriented mission statements and practical implementations.
